SCOPE AND CONTENT NOTE

The items in this collection are part of the Russell A. Mann Sherlock Holmes Research Collection, but have not been cataloged individually because they are not in their original formats (represented here as printouts or photocopies), are typescripts, ephemeral, three-dimensional, or are otherwise deemed unsuitable for individual catalog records.

SUBGROUP DESCRIPTIONS

Subgroup I. John Bennett Shaw and Sherlock Holmes: A Collection of Documents and Materials Drawn from a Busy and Dedicated Life

The first subgroup consists of correspondence, publications, and ephemera from 1966 to 2001 concerning John Bennett Shaw (1914-1994), a Sherlock Holmes scholar from Santa Fe, New Mexico, who amassed one of the largest Sherlockian libraries in the world. He donated it to the University of Minnesota in 1993 to join the already substantial library of Philip S. and Mary Kahler Hench. These papers were accumulated most likely by Robert C. Hess, a Sherlockian enthusiast from Brightwaters, New York.

Subgroup II. Monographs, Serials & Ephemera

The second subgroup consists of photocopies and printouts of monographs, articles, scripts, and indexes, as well as maps, illustrations, and various forms of ephemera accumulated by Russell A. Mann. **Series A. Monographs & Articles** consists primarily of printouts of short monographs previously published on the Internet; printouts and photocopies of articles, scripts, and exhibition catalogs; bibliographies; unpublished monographs; and other short papers, usually written by a single named author. They are arranged alphabetically by the name of the author or by title. **Series B. Anthologies & Topical Files** are files of articles, stories, and other resources on specific topics compiled by Russell A. Mann. Most have titles assigned by Russell Mann and are arranged alphabetically by title or by subject. **Series C. Periodicals** consists of printouts of niche Sherlockian periodicals previously published on the Internet, various theater playbills, and single issues of obscure entertainment periodicals containing insignificant articles for general readers. **Series D. Indexes** consists of typewritten indexes to several books prepared by Adrian Nebbett. **Series E. Illustrations & Ephemera** contains assorted illustrations, cartoons, postcards, and ephemeral items.

Subgroup III. Sherlock Holmes Collectibles

The third subgroup contains mostly three-dimensional collectibles concerning Sherlock Holmes, such as puzzles and games, toys and dolls, pottery, figurines, and other assorted collectibles. They are organized by format, but are arranged in no particular order.
